

IDS WARRANTY POLICY AND PROCEDURES

(EFFECTIVE 10/01/2022)

IDS products are warranted to be free from defects in workmanship and material under normal use and service for 1 year with unlimited miles or hours of operation from the date of purchase.

IDS warranty is limited, at its option, to 1) replacement of the failed product, or 2) reimbursing the cost of the product shown on the original IDS invoice. IDS is not responsible for labor, consequential, progressive, downtime, or other costs related to a failure.

IDS products suspected of failure must be returned to IDS Technical Support in USA for consideration of warranty, unless otherwise instructed by IDS.

Tampering with or modifications to IDS products, (including components of the original manufacturer) which alter the performance and/or emissions specifications of the product voids any warranty from IDS. Failures resulting from abuse, improper assembly, adjustment, alteration, operation, and/or lack of proper maintenance, are not covered by this warranty.

The warranty terms noted above do not apply to 1) products replaced from a previous warranty claim, or 2) products provided at “no charge” for any reason.
